

FAQ

What are your basic technical requirements?

We will need a power supply of at least 4 x 13 amp plug sockets minimum, a suitable space for storing personal belongings, and a designated area for parking must be provided.

Do you provide sound and lighting equipment?

Country Chicks UK are self-contained and provide all PA equipment, instruments and lights needed to carry out our performance.

What information do you require about a venue?

We need a performance space of at least 6 metres across by 4 metres deep.

Please let us know if a Sound Limiter is installed.

If the event is outdoors, we'll need suitable cover to protect electrical equipment from weather conditions such as rain and heat.

Can you provide a Spotify/DJ service before and between your sets?

We are happy to play music from a playlist as we set up and between sets, with a style of music similar to that is being performed.

What is the best gig you've ever done and the best venue you've ever played at?

Teaching the Coldstream Guards our very own line dance was a real 'pinch me' moment! Most famous for protecting the royal family in their red coats, furry black hats and incredible live music of their own, we had a fantastic evening entertaining them!

What's your previous experience and how did you start gigging?

Made up of 6 fantastic musicians, Rachel, Kirsty, Nia, Sarah, Suzanne and Danielle have been performing in the industry for many years in multiple music projects, including the live finals of Britain's Got Talent. Spotting a gap for an all-female, 100% live Country Music band, Rachel pulled the girls together and they debuted as Country Chicks UK in a theatre in early 2024. They have been performing together at a variety of events ever since!

What's your favourite type of event to play at?

Our favourite type of event is one where the crowd are with us dancing, singing and clapping along! We have our own line dance we teach, which is easy to follow so everyone can join in!

What are your typical setup and performance times?

We ask for a minimum of two hours set up time, directly prior to the start of our first set, to load in equipment, set up and sound check.

Are you happy to perform outside?

We love to perform outside. If your event is outdoors, we ask for suitable cover to be arranged to protect electrical equipment from weather conditions such as rain and heat. The floor must also be flat, stable, and even.
